

This listing of claims will replace all prior versions, and listings, of claims in the application:

Claims 1-26 (canceled)

1 Claim 27 (currently amended): A method of implementing a  
2 service that provides information on speed detection device  
3 locations, the method comprising:

4 operating a device in a vehicle to collect and report  
5 information relating to vehicle speed measurements, said  
6 step of operating the device in the vehicle including: the  
7 ~~method comprising:~~

8 ~~operating a detector to monitor~~

9 i) monitoring to detect at least one of a radar and a  
10 laser signal and, in response to detecting one of said  
11 signals, generating a signal indicative of detection of a  
12 signal;

13 ii) generating, in response to detection of a signal, a  
14 set of data including geographic position information  
15 indicating the position where said signal was detected;

16 iii) generating a message including at least a portion of  
17 said set of data, said portion including said geographic  
18 position information; and

19 iv) operating a wireless transmitter to transmit said  
20 message to an information service provider ~~over~~; and

21 operating said information service provider to provide a  
22 billing credit to a subscriber corresponding to said device  
23 that transmits said message.

1 Claim 28 (currently amended): The method of claim 27,  
2 wherein said step of operating the device in the vehicle  
3 further includes: comprising:

1 operating a global position device to supply said  
2 geographic information.

1 Claim 29 (previously presented): The method of claim 28,  
2 wherein said step of generating a set of data includes:  
3 including in said set of data, time information  
4 indicating the time said signal was detected.

1 Claim 30 (currently amended): The method of claim 29,  
2 wherein said step of generating a set of data further  
3 includes:  
4 including in said set of data, information indicating the  
5 date said signal was detected.

1 Claim 31 (currently amended): The method of claim 27,  
2 further comprising:  
3 updating a local database of speed trap information in  
4 said vehicle to include said generated set of data.

1 Claim 32 (previously presented): The method of claim 31,  
2 wherein said generated message is an E-mail message.

1 Claim 33 (currently amended) A system for collecting  
2 information on speed detection device locations and for  
3 billing subscribers for such information, the system use in  
4 a mobile vehicle comprising:

5 a radar and laser detector included in a vehicle for  
6 detecting radar and laser signals and for generating an  
7 alert signal indicative of detection of a radar or laser  
8 signal;

9 data set generation means included in said vehicle,  
10 for generating, in response to detection of an alert

1 signal, a set of data including geographic position  
2 information indicating the position where said a radar or  
3 laser signal was resulted in said alert signal being  
4 generated was detected;  
5 message generation means included in said vehicle  
6 for generating a message including at least a portion of  
7 said set of data, said portion including said geographic  
8 position information; ~~and~~  
9 a wireless transmitter included in said vehicle for  
10 transmitting said message to a speed trap information  
11 service provider; and  
12 wherein said speed trap information service provider  
13 includes means for providing a billing credit in response  
14 to receiving said message.

1 Claim 34 (currently amended): The system of claim 33,  
2 further comprising:  
3 a global positioning device located in said vehicle for  
4 providing information indicating the position of the mobile  
5 vehicle when said radar and laser detector detects a  
6 signal.

1 Claim 35 (currently amended): The system of claim 34,  
2 further comprising:  
3 a clock located in said vehicle, for providing  
4 information indicating a time of day when said radar and  
5 laser detector detects a signal.

1 Claim 36 (previously presented): The system of claim 35,  
2 wherein said clock further provides date information  
3 indicating a date when said radar and laser detector  
4 detects a signal.

1 Claim 37 (new): The method of claim 27, wherein said step  
2 of operating said information service provider to provide a  
3 billing credit includes:

4 providing a credit up to a preset maximum credit amount.

1 Claim 38 (new): The method of claim 27, wherein said step  
2 of operating said information service provider to provide a  
3 billing credit includes:

4 providing a credit of a few cents for each message.
